

Smart India Hackathon 2018

Ministry/state

Government of Chandigarh

Sector : Education & Skills

Software

Student Mobile App

Problem Code: #GCH2

College Code:

Team Name : **CyberKnights**

Team Leader : **Savneet Chhatwal**

chhatwal_savneet.ghrcecs@raisoni.net

Problem abstract

— — —

- Provide **information/data** regarding the **particular college**.
- State/Centrally **sponsored schemes and events**.
- **Track attendance** (by students, teachers and parents).
- Provide important **information and updates** e.g. circulars, results, exam dates, timings, etc.
- Library **book return reminder**.
- Login with roll number/id number.
- Allow parents to **track their ward's attendance, performance** as well as location.
- **Share documents** like domicile and bonafide.
- Connected to Central Governmental database.
- **Connected with AADHAR** to enable verification of documents.
- **Get data of any student anywhere** like:
State -> University -> College -> Student

Clavi

This is an all-in-one college management app.

College Admins	View and Edit	View and Edit	View and Edit	Yes	View and Edit	View and request	Yes	View	Yes
University Admins	View and Edit	View	View on Request	No	No	View on Request	No	View	Yes
Govt. Admin	View and Edit	View	View on Request	No	No	View on Request	No	View and Edit	Yes

Current Market Scene

We observed that very few **apps** are available which can **solve** the **problems** only **partially**.

For eg:

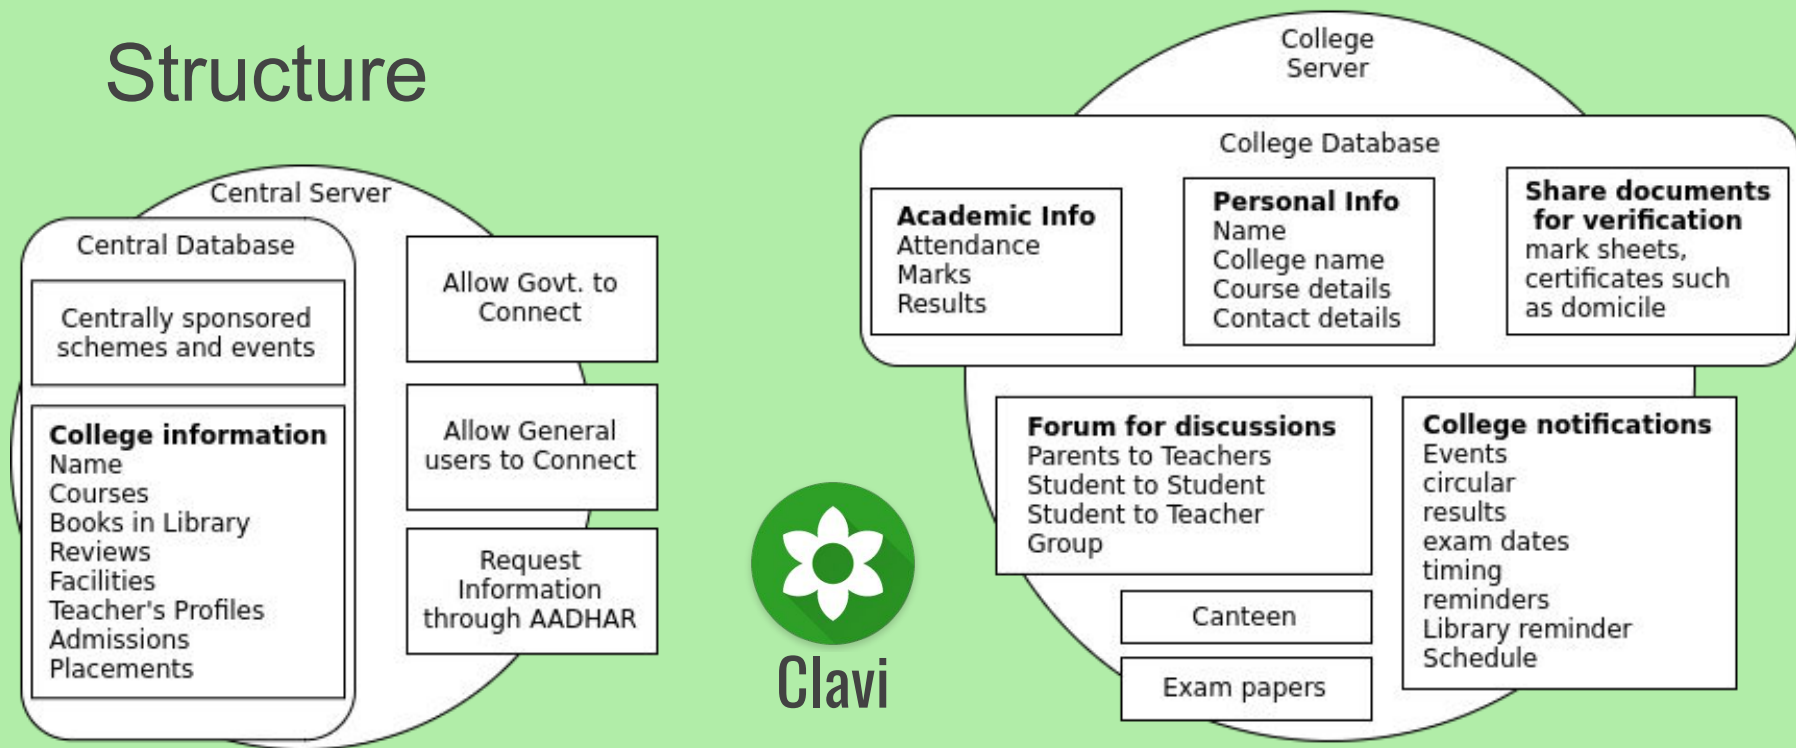

GHRCE STUDENT DIARY APP:
attendance, results and course
details of students.

MY STUDY LIFE: Schedule

Our Specialities

- Student's assistant for everything
- Device independent
- Cross platform
- Centralised Database
- Aadhar Integration
- Teacher-parent interaction

Structure

What is Clavi Personal Assistant?

It can talk to you

Assess and track your academic performance

Motivating reminders to improve your performance

Personalized only for you

Technical Specifications and Requirements

Application

- Cross platform hybrid application
- Based on web technologies
 - Login from any device
- Native wrapper provided by Phonegap
- Design framework provided by Materialize

Other Requirements

- Internet Connection

Devices

- Central server
- Institutional server
- Mobile devices as clients
- Desktop computers as clients
- Desktop computers for special tasks like canteen

Server

- Nodejs Runtime
- Linux based operating system (Recommended)
- SQL DB or MongoDB (MongoDB is preferred)
